## Environmental Protection & Mitigation Measurements

CKR-CT has always been committed to environmental protection on the site and related mitigation measures, including regularly removing weeds and stagnant water, and spraying mosquito larvicidal to reduce mosquitoes breeding. The project team also collects diesel samples regularly, and sewage treatment facilities have been set up in the works site to ensure that the effluent meets relevant environmental protection standards.

Processing of effluent with Sewage treatment plant before discharge

## -Dump Truck-

Electronic scale is installed in every dump truck to ensure no over-loading.

Dump trucks must undergo the following procedures before leaving construction site to prevent the dusty materials from being carried off-site and deposited on public roads:

- Cover the materials with impervious sheeting; and
- Wash the wheels and dump trucks thoroughly.

In order to prevent vehicle-pedestrian collisions, dump trucks must follow the instructions given by the traffic controller when leaving and entering construction site.

Automatically wheel washing system has been set up at exit and dump trucks are fully covered

Lok Man & Ma Tau Wai
