

26th June 2025

Site Visits to Central Kowloon Route
by Chartered Institution of Highways and Transportation

On 26th June 2025, representatives from Chartered Institution of Highways and Transportation (CIHT) visited the Central Kowloon Route (CKR).

The project team introduced the CKR project to the CIHT representatives and shared how they utilized cutting-edge technology and innovative methods for design, construction, and operation. Among these, the Smart Site Management Hub (SSMH) established by the team is equipped with smart devices, providing comprehensive monitoring of all ongoing works on the CKR, thereby enhancing site management efficiency. Project team members from the Highways Department, consultants, and contractors can easily browse their respective contracts and closely monitor daily operations, safety, and work performance on-site.

The project team then led the CIHT representatives to the Kai Tak site, demonstrating the construction methods and techniques for the viaduct and tunnel. This showcased the challenges faced during the construction stage. They also learned about the CKR's commitment to cultural preservation during the planning, design, and construction phases, striving to achieve a balance between cultural conservation, historical preservation, the livelihoods of people, and economic development in urban growth, thus practicing the concept of sustainable development.

英國特許公路及運輸學會參觀中九龍幹線

在 2025 年 6 月 26 日，來自特許公路及運輸學會 (CIHT) 的代表訪問了九龍幹線 (CKR) 。

工程團隊向 CIHT 代表介紹中九龍幹線項目如何運用尖端技術和創新方法進行設計、建造及營運。其中，團隊建立的智慧工地管理平台 (Smart Site Management Hub, SSMH) 配備了智能設備，對所有正在中九龍幹線進行中的工程實施全面監控，提升工地管理效率。來自路政署、顧問及承建商的項目團隊成員，可以輕鬆瀏覽各自合約，密切監控現場的日常操作、安全和工作表現。

工程團隊隨後帶領 CIHT 代表到訪啟德工地，展示行車天橋和隧道的建造方法與施工技術，及工程所面對之挑戰，了解中九龍幹線在規劃、設計和施工期間一直重視文化保育，努力在城市發展中達到保育文化、歷史、人民生活 and 經濟產業發展的平衡，實踐可持續發展的理念。
