

Enhanced preventive measures against heat stroke

The weather in Hong Kong continued to be hot, and the Observatory issued a very hot weather warning for 15 consecutive days since mid-July this year. For workers who need to work outdoors, prevention of heat stroke is a crucial issue. In accordance with the arrangements proposed by the Construction Industry Council's "Site Safety Guidelines for Working in Extremely Hot Weather", the Central Kowloon Route Project Team has implemented various measures to prevent heat stroke on the site, so that frontline workers can work safely.

中九龍幹線－加強預防措施對抗酷熱天氣及提防中暑

本港天氣持續炎熱，天文台自本年7月中起連續15日發出酷熱天氣警告。對需要戶外工作的工友而言，預防中暑是至關重要的議題。中九龍幹線工程團隊根據建造業議會《在酷熱天氣下工作的工地安全指引》倡議的安排，在工地內實施了不同的預防中暑措施，讓前線工友可以安心工作。

Provision of Heat Stroke Seminar
提供預防中暑講座

Provision of Ice Making Machine
提供製冰機

Provision of Shelter and Cooling Fan
提供通風設備

Distribution of Pocari Sweat
派發寶礦力

Provision of Water Bottle
提供個人水樽

Provision of Vending Machine
提供自動售賣機設備

Provision of Portable Fan
提供個人手提風扇

Distribution of water melon
派發西瓜

Distribution of ice cream
派發雪糕
