27 December 2023

Site Visit to Community Liaison Centre & Kai Tak West site

by St. Louis School Transport Society

St. Louis School Transport Society visited the Central Kowloon Route (CKR) - Community Liaison Centre (CLC) and Kai Tak West works site on 27 December 2023.

The visit commenced with an informative presentation at the CLC that provided participants with comprehensive information about the CKR – Kai Tak West Project. After the presentation, the students had the opportunity to experience the Computer Aided Virtual Environment (CAVE) during the CLC guided tour. This immersive experience allowed them to gain valuable insights into the implementation of Building Information Modeling (BIM) in the CKR Project. Following that, they proceeded to the Kowloon City Ferry Pier to get an overview of the Kai Tak West works site, learning about the construction methods employed for the underwater tunnel.
